

Dear,

For several years, our company, which is committed to complying with the European regulations and guaranteeing the conformity of products to our customers, has taken measures and implemented actions to meet the requirements in terms of Quality and Environment (ISO 9001, EN 9100 certifications, ISO 14001 and compliance with the ROHS directive, compliance with the legislation on Conflict Minerals).

The European regulation 1907/2006 concerning the registration, evaluation and authorization of chemicals called REACH entered into force on 1 June 2007 and complements our environmental requirements.

We are obviously completely involved in this project as a spring manufacturer.

This is why we confirm that we have checked the pre-registration of substances in our products by our suppliers of materials and all our subcontractors (coatings, heat treatments, paints ...). We therefore guarantee that all delivered items will comply with the list of REACH substances of 16/07/2019.

For any additional information, your contact person in charge of this file within our company is :

Mrs JULLIEN Pascale

91 rue de la croix de mission

42100 SAINT-ETIENNE

e-mail: novaessort@novaessort.fr
